

List of 2017-18 Natural Disaster Resilience Grant Scheme projects

Organisation	Hazard	Project Title	Project Description	Total Funding (NDRGS & State contribution) (ex. GST)
Buloke Shire Council	Flood	Charlton Flood Mitigation Levee Detailed Design – Stage 2	This project will determine the costs of the works that were identified from the detailed design work undertaken in stage one of the project for a Charlton Flood Mitigation Levee.	\$86,000
Campaspe Shire Council	Flood	Rochester Resilience Project	This project will implement Stages 4-8 of the adopted Rochester Flood Management Plan, maximising advantages of the warning systems installed through stages 1-3 by increasing the capacity, capabilities and resilience of the Rochester community in preparing for, responding to and recovering from floods.	\$100,000
Campaspe Shire Council	Flood	Kyabram Flood Study	This project will undertake a study to determine the impacts of flooding at, in and the surrounds of Kyabram. The project will assess flood risk and help to determined mitigation strategies. Flood intelligence will be used for emergency management planning, planning scheme and community education.	\$120,000
Colac Otway Shire Council	Flood	Birregurra Flood Study and Floodplain Management Plan	This project will undertake a study that will determine the potential impacts of flooding at the township of Birregurra. Mapping will be used for emergency management planning, updating the planning scheme and in community education.	\$168,000
Gannawarra Shire Council	Flood	Quambatook Township Flood Mitigation Works - Stage 2	This project will undertake construction of sections of permanent levee bank from the town's railway line through to Ninetyone Road. The project will help to protect the town in the event of a 1% AEP flood, as per the recommendations of the Quambatook Flood Management Plan.	\$266,600
Gannawarra Shire Council	Flood	Koondrook Township Flood Study	This project will undertake a study that will examine the potential impact of flood events on the township of Koondrook and resolve and assess mitigation measures.	\$100,000

Organisation	Hazard	Project Title	Project Description	Total Funding (NDRGS & State contribution) (ex. GST)
Greater Bendigo City Council	Flood	Racecourse Creek, Bendigo - Levees and Floodway Detailed Design	This project will undertake a detailed design and land acquisition mapping exercise relating to the construction of levees along both banks of Racecourse Creek, Bendigo between the Bendigo - Echuca Railway Line and Bendigo Creek. The project will also include an additional levee extending eastwards from the Bendigo - Echuca railway line along Golf Course Road.	\$86,000
Greater Bendigo City Council	Flood	Flood Mitigation Study for Kangaroo Flat & Golden Square, Bendigo	This project will undertake a flood mitigation study for Kangaroo Flat and Golden Square. The flood mitigation study will investigate and develop options for the reduction and management of flood flows in these areas.	\$160,000
Indigo Shire Council	Flood	Flood Study and Evaluation of Flood Mitigation Works - Chiltern	This project will undertake a hydraulic assessment to revise flood mapping following recent mitigation works. The project will also review mitigation works and planning scheme overlays for the township.	\$80,000
Loddon Shire Council	Flood	Pyramid Hill Flood Mitigation	This project will undertake construction of new flood protection levees on the perimeter of the Pyramid Hill.	\$324,000
Macedon Ranges Shire Council	Flood	Woodend Flood Study	This project will undertake a study to determine the potential impacts of flooding from Five Mile Creek and its tributaries within the township boundaries of Woodend. Mapping will be used for emergency management planning, updating planning schemes and in community education.	\$140,000
Moir Shire Council	Flood	Upper Broken and Boosey Creek Regional Flood Study	This project will undertake a study to determine the impacts of flooding at Katamatite, Tungamah, Wilby, Devenish, Thoona and Goorambat. Mapping will be used for emergency management planning, planning schemes and community education.	\$180,000
North Central Catchment Management Authority	Flood	Rapid Flood Risk Assessments across the North Central CMA region	This project will enhance the resilience of local communities to natural disasters by determining the flood risk to 21 townships. The project outputs will be used for land use and development planning, emergency management planning, community education and future work prioritisation.	\$136,000
North Central Catchment Management Authority	Flood	Community Flood Education Signage Boards	This project will provide the townships of Donald, Charlton, Carisbrook, Creswick and Rochester with community flood education signage boards that will increase the communities' understanding of flood predictions, risk and flood response during flood events.	\$22,000

Organisation	Hazard	Project Title	Project Description	Total Funding (NDRGS & State contribution) (ex. GST)
Northern Grampians Shire Council	Flood	St Arnaud Flood Study	This project will undertake a study to determine the potential impacts of flooding on St Arnaud. Mapping will be used for emergency management planning, updating planning schemes and in community education.	\$120,000
Pyrenees Shire Council	Flood	Upper Avoca River Flood Study	This project will undertake a study to determine the potential impacts of flooding at Amphitheatre, Avoca and Natte Yallock. Mapping will be used for emergency management planning, updating planning schemes and in community education.	\$160,000
Pyrenees Shire Council	Flood	Raglan Flood Study	This project will undertake a study to determine the potential impacts of flooding in the town of Raglan. Investigation outputs will be used for emergency management planning, updating planning schemes and in community education.	\$104,000
Strathbogie Shire Council	Flood	Castle Creek Flood Mitigation Project	This project will develop a new floodplain management plan for Euroa and examine the effect of a historical informal levee and additional spur levees to protect houses still exposed to flooding.	\$120,000
Swan Hill Rural City Council	Flood	Robinvale Township Levee Reconstruction	This project will re-construct an informal levee to current standards to be able to provide protection against 1% AEP river flood.	\$409,960
Warrnambool City Council	Flood	Russells Creek Total Flash Flood Warning System	This project will implement a total flood warning system for Warrnambool's Russell Creek catchment, comprising the installation of weather monitoring equipment, the development of an emergency response plan, and a community education campaign to help residents understand their level of risk, and how to respond when warnings are issued.	\$187,000
Wellington Shire Council	Flood	Seaspray Flood Protection Levee - Design Phase	This project will undertake the design phase of a proposed upgrade of the existing Seaspray Flood Protection Levee.	\$80,000
Wodonga City Council	Flood	Flood Studies Jack in the Box Creek and Felltimber Creek Wodonga	This project will undertake to revised and update the flood study for Felltimber Creek and Jack in the Box Creek.	\$40,000
Wodonga City Council	Flood	Cypress Court flood levee design	This project will undertake to design a flood levee to protect existing properties in Cypress Court, Wodonga when House Creek floods.	\$20,000
